

OEM Equivalent Plate Heat Exchanger Replacement Parts

Thermaline offers a full range of OEM quality replacement parts for most makes and models of gasketed plate style heat exchangers. We support a wide range of plate and gasket material type. Additionally, we offer a host of other services for your heat exchangers regardless of the manufacturer.

These include:

Restreaming and Reconfiguring: Has your process changed, or do you have a new duty? Thermaline can restream and provide drawings to suit your needs for most makes and models.

Service and Repair: Send us your entire heat exchanger and we can hydro test, cross contamination test (CCT) and rebuild it to ensure there are no internal defects.

On-Site: Our service team can travel to your facility and perform repairs, on-site cross contamination testing (CCT), plate cleaning, re-gasketing and inspections.
